

Getting Schroedinger Shooter

- 1 Go to [here](#).
- 2 Download the installer for your machine which includes Java VM.
- 3 Double-click on `install_shooter_0040.exe`.
- 4 You may have to approve the installation of the software despite warnings from your computer.
- 5 You should get the installer after approving changes to your machine. I usually just take the defaults.
- 6 When complete search for `shooter` or `Shooter_2.2.0036` to find the executable and double-click it. You should get a window like the one below.
